

Remas Nafea Alsulami

Software Engineer

 LinkedIn  +966547879850  remasnalsulami@gmail.com  Portfolio  GitHub

PROFILE

Software engineering student focused on front-end development, back-end development, and team leadership. Enjoys building web applications and enhancing them with new tools and technologies.

EDUCATION

University of Jeddah

Bachelor's Degree in Software Engineering | Expected Graduation: 2027 | GPA 4.85

PROJECTS

Medixa

03/2026 – 05/2026

Role: Full-Stack Developer

- Awarded Best Project Certificate by the Department Chair for project quality and innovation.
- Collaborated with a team of 3 to build a healthcare platform for detecting potential drug interactions.
- Developed the OCR module using Tesseract.js to extract medication names from uploaded images.
- Built a real-time chat feature using WebSockets, enabling direct communication between users and pharmacists.
- Contributed to both front-end and back-end development

Atelier

09/2025 – 11/2025

Role: Full-Stack Developer

- Collaborated with a team of 5 to build a digital art marketplace, contributing to both front-end and back-end development.
- Worked within a 3-member sub-team to implement a WebXR-based AR feature, allowing users to preview artworks in their physical space before purchasing.
- Developed and integrated front-end components with backend functionality across the platform.
- Worked in two-week Agile/Scrum sprints to plan and deliver project features.

ReceiptVault

07/2026 – 09/2026

Role: Full-Stack Developer | Personal Project

- Built and deployed a full-stack web application that digitizes paper receipts into searchable records using OCR.
- Implemented receipt image processing with Tesseract.js to extract key information such as merchant name, date, and total, with a review step for correcting extracted data.
- Developed secure authentication and receipt management using Node.js, Express, MongoDB, hashed passwords, and JWT-protected routes.

ACTIVITIES

Tuwaiq Club – University of Jeddah

Programming Track Co-Leader

- Co-plan the Programming Track activities and initiatives, adapting the plan around members' interests and engagement.
- Developed a custom interactive member survey based on the track's requirements, replacing a standard form with a more engaging, code-based experience; later adapted it for the 3D Track as part of a cross-track collaboration.

Absher Tuwaiq Hackathon

Designed the prototype flow and interface using Figma, and presented the solution to the judging committee

"Wajhatuna Tahki" Project Exhibition

University of Jeddah IoT Project Exhibition

SKILLS

- **Languages:** JavaScript, Java, Python ,TypeScript
- **Frontend:** HTML, CSS,JavaScript , WebAR(AR.js)
- **Backend:** Node.js, Express.js, REST APIs, MongoDB, MySQL ,Tesseract.js (OCR), Postman
- **Tools & Methodologies:** Git, GitHub, Figma, Agile/Scrum ,Requirement Analysis , User Research

LANGUAGES

Arabic

English
