PROFILE

A student of software engineering with practical front-end and back-end web development expertise. enthusiastic about developing cutting-edge software solutions and incorporating cutting-edge technology, such as computer vision and augmented reality (WebXR), to produce interactive apps. eager to keep learning, adapting, and broadening my knowledge in many software engineering domains.

EDUCATION

University of Jeddah

Bachelor's Degree in Software Engineering | Expected Graduation: 2027 | GPA 4.85

PROJECTS

Medixa

03/2026 – 05/2026

Role: Full-Stack Developer

- Developed the frontend using HTML, CSS, and JavaScript, and contributed to the backend using Node.js and Express.js.
- Implemented OCR (Optical Character Recognition) using Tesseract.js and Computer Vision techniques to extract medication names from images.
- Developed a real-time chat feature using WebSockets to enable communication between users and pharmacists.
- Collaborated with the development team to build a healthcare platform for detecting potential drug interactions.
- Awarded Best Project Certificate by the Department Chair for project quality and innovation.

Atelier

09/2025 – 11/2025

Digital Art Marketplace

Role: Frontend Developer

- Developed the frontend of a digital art platform using HTML, CSS, and JavaScript.
- Contributed to the implementation of Augmented Reality (AR) features using WebXR, enabling users to preview artworks in their own environment before requesting or purchasing them.
- Collaborated with the development team to integrate frontend components and enhance the overall user experience.

Flight Ticket Booking System

10/2024 – 11/2024

Role: Java Developer / Team Leader

- Developed a desktop-based flight booking system using Java and Java Swing.
- Designed and implemented graphical user interfaces (GUI) for flight search, booking, and reservation management.
- Contributed to the development of core booking system functionalities using Java.
- Led task distribution within the team, coordinated development activities, and ensured smooth project workflow.

ACTIVITIES

- Absher Tuwaiq Hackathon
- "Wajhatuna Tahki" Project Exhibition
- University of Jeddah IoT Project Exhibition

SKILLS

- Programming Languages: Java, JavaScript, Python, C
- Web Technologies: HTML, CSS, JavaScript, Node.js, Express.js
- Computer Vision (OCR):Tesseract.js
- Augmented Reality: WebXR
- Database: MongoDB,MySQL
- Tools: Git, GitHub, Postman
- UI/UX Design
